

Space Weather Handbook DVD Released by ATA

Solar storms that cause bright auroras can also affect people and technology in space and on Earth. The development of the scientific understanding of that Sun-Earth relationship is examined in *Space Weather—A Philatelic Journey*, a new philatelic handbook published in DVD format by the American Topical Association.

Written by meteorologists Garry Toth and Don Hillger, it contains descriptive text, stamp and cover images, and an extensive and up-to-date checklist. More than 200 pages of detailed information are in .pdf format. The checklist appendices in Excel format are also included.

The handbook will be of interest to collectors of numerous space and weather-related topics.

Garry Toth, MSc, was an operational meteorologist with the Meteorological Service of Canada. His topical interests are weather, climate, space weather and planetary weather.

Don Hillger, PhD, is a satellite meteorologist with the National Oceanic and Atmospheric Administration and holds a cooperative position at Colorado State University. His topical interests include unmanned scientific satellites, weather and climate.

The DVD is \$35, or \$30 for ATA members, plus \$1.50 postage in the U.S. and Canada, or \$3 elsewhere. Order from American Topical Association, PO Box 8, Carterville, IL 62918-0008, americantopical@msn.com. Preorders will be taken for a printed book version until Mar. 31, 2018.
